

# Beinat Landa

*An industrial engineer with a master's in business innovation and project management looking to make a career change and get a job in web development. I am a hardworking and committed person, with strong analytical and reasoning skills that thrives in fast paced environments and teamwork. I have a passion for building things that other people can use and I am looking for a development position in an exciting start-up where I can apply my knowledge and skills and grow as a developer.*
